

PATTERSON PUMP COMPANY

EXPORT POLICY STATEMENT

As a global company which operates in the United States, Patterson Pump Company is governed by U. S. export control rules and regulations regarding the export and/or re-export of products, spare parts, accessories, training materials and technical data. It is the policy of Patterson Pump Company that under no circumstances will sales be made contrary to U. S. Export control law and regulations or the policies and procedures of Patterson Pump Company's Export Management and Compliance Program.

Every employee, distributor or representative of Patterson Pump Company must remember that exporting our products is a privilege, not a right, granted by the U. S. Government. This is critical for Patterson Pump Company because, approximately 50% of our sales take place in the international market place. Although most of our products do not require Export Licenses prior to shipment to most countries, many products are now more tightly controlled because of concerns regarding the proliferation of chemical and biological weapons, missile technology and nuclear weapons. Accordingly, Patterson Pump Company as an exporter must assume even greater responsibility for screening its customers and transactions. Careful review of both the end-use and the end-users involved with our international transactions is required to ensure export control compliance.

Patterson Pump Company asks that each of you take this issue very seriously and support the company in this effort. If you have any questions concerning the legitimacy of a transaction or potential violation, please contact:

Bobby R. Rickman, Vice President, Contract Compliance/Export Compliance Officer
